Hanger Applicator Instructions

1. Lift the top of the Hanger Applicator to expose the opening the hanger strip is inserted into. 2. Slide the hanger underneath the lip of the Hanger Applicator with the adhesive strip facing up. (Push it all the way in and against the right edge). 3. Peel off the adhesive from the hanger (starting from the left).	
4. Pivot the top of the Hanger Applicator down on top of the hanger. (You should see a little bit of white through the holes). 5. Align the document against the top right of the first lip on the Hanger Applicator. 6. Place pressure on the middle / top of your document while gently lifting the top of the Hanger Applicator. (This allows the document to fall down onto the exposed adhesive).	
7. Tap in the middle of the document to prevent wrinkling. 8. Tap down, alternating left and right from the center, until you reach the edges. 9. Use your fingers to press down on the document to seal the document to the hanger.
